

**Targeted Mortgage
Banking Exam**

Don't find yourself...

...sitting out on the sidewalk.

A Targeted Mortgage Banking Exam is a comprehensive review of your entire mortgage banking operation. It's a thorough and detailed analysis of all aspects of your mortgage business.

We look at over 80 areas, and where possible, we'll benchmark you against your peers. You'll get a Risk Score on Financial Performance and Controls, Operational Risk, Compliance, Interest Rate Risk, and Systems,

and we'll recommend changes you should consider. We'll also provide a set of management reports that can help the Board and senior management provide better oversight.

Many of our clients have used this Exam when their regulator requires an outside audit. And who knows, it just might keep you from ending up on the sidewalk.
